

Streamline Announces Partnership with Pearl Energy Investments and Energy Innovation Capital, and Strategic Acquisition to Further Expand Gas and Water Treatment Services

SAN ANTONIO, July 2, 2019 /PRNewswire/ -- Streamline Innovations, Inc. ("Streamline"), a technology provider specializing in hydrogen sulfide ("H₂S") treatment for natural gas and water, announced a new strategic partnership with Pearl Energy Investments ("Pearl") and Energy Innovation Capital ("EIC"). This partnership with Pearl and EIC, both premier growth enablers in the energy sector, helped fund the acquisition of proprietary chemical supplier Advanced Oxidation Technology ("AOT"), and is expected to fuel the continued expansion of Streamline's flagship technology, the Valkyrie™ ("Valkyrie").

Streamline's Valkyrie technology removes H₂S from natural gas, produced water, and wastewater. Representing a step change improvement in H₂S treatment, Valkyrie is environmentally forward and rapidly expanding as a cost-effective industry solution.

Founded in 2015, Streamline deploys advanced technologies for water and gas treating and related processes to help oil and gas, utilities, industrial, and municipal customers, both domestically and internationally.

Dave Sisk, Streamline CEO and Co-Founder, noted, "Streamline is uniquely positioned to solve the growing problem of high H₂S in energy and industrial markets. Our new partners will leverage deep industry contacts to introduce the Valkyrie technology to a broad range of customers with H₂S treatment needs."

The Streamline team is an impressive combination of industry veterans and entrepreneurs with extensive technical and commercial expertise," said Billy Quinn, Managing Partner at Pearl. "Our investment reflects our confidence in Streamline's businesses plan and our dedication as a long-term partner."

George Coyle, a Managing Partner at EIC, added, "Streamline's superior solution to remove H₂S enables its customers to improve operations and safety, and lower costs. We are excited to support growth at Streamline as they continue to rapidly gain market share."

About Streamline Innovations, Inc.

Streamline is a technology company focused on innovative and sustainable gas and water treatment solutions for natural gas, produced water, and wastewater. The company's patented, regenerative, environmentally forward gas treatment process represents a step change improvement in H₂S treatment and is rapidly expanding as a cost-effective industry solution. Following the acquisition of AOT, Streamline changed its name from Streamline Chemical, LLC to Streamline Innovations, Inc.
